

European Beech

Latin Name: Fagus Sylvatica

Origin: Europe

Strength Class: D30

Weight: Approx 710 kg/m³

Durability: Durable

Description: A pale cream colour, sometimes with a pink or brown shade. The grain is straight with a fine to medium uniform texture.

Mechanical Properties: It machines well, glues easily and produces a good finish. Responds superbly to steam bending. It does however have a large amount of movement in service. It is prone to warping, checking and splitting whilst drying.

Main Uses:	Lumber	Cabinetry
	Veneer	Musical Instruments
	Flooring	Plywood
	Boat Building	Turned objects
	Furniture
