

## **Whitewood C16**

Latin Name: *Picea abies*

Origin: European

Strength Class: C16

Weight: Approx 490 kg/m<sup>3</sup>

Durability: Non-Durable

Description: The sapwood and heartwood of Sawfalling Whitewood are not clearly marked off from each other, the wood being a very pale yellowish-brown colour, sometimes almost whitish.

Mechanical Properties: Non-durable but it responds well to all preservative agents including water soluble preservatives. Drying creates no special problems except when knotty. The wood holds its shape when dry.

Main Uses:	General Joinery	Furniture
	Interior Joinery	Flooring
	Staircase Manufacturing	Construction
